## Naval HADR and Super Typhoon Haiyan

By Euan Graham  
Senior Fellow, Maritime Security Programme

THE international response to Typhoon Haiyan, which cut a swath of destruction through the central Philippines on 8 November, has underscored the naval dimension to Humanitarian Assistance and Disaster Relief (HADR) operations in Asia. The U.S., U.K. and Japan all deployed military assets commensurate with their large civilian aid efforts. Several ASEAN members also deployed defence assets, bilaterally, to support the relief operation. However, questions remain about the lack of a coordinated response within Southeast Asia, given the prominence that HADR cooperation has had within ASEAN itself, the ASEAN Regional Forum (ARF) and the ADMM-Plus.

Naval assets are only one part of the HADR toolkit, which remains civilian-led. But navies are often first on the scene. Suitably trained and equipped, they bring ready-made capabilities and skilled personnel for damage assessment, delivering emergency supplies directly to the point of need. Ship-based communications can help to direct the wider relief effort when land-based civilian infrastructure is insufficient.

Navies' ability to operate autonomously offshore confers unique advantages. It can help overcome land-based logistical bottlenecks. Politically, it can also mitigate the sensitivities of local populations towards a foreign military presence. Beyond the "first response" phase, a floating presence just out of sight gives relief workers and vulnerable evacuees temporary respite in a safe "rear area" that carries its own force protection.

As was the case following the Indian Ocean tsunami in December 2004, a U.S. aircraft carrier and its accompanying escorts were able to respond quickly. The USS George Washington commenced relief operations in the Philippines within the first week, ferrying emergency supplies and fresh water to affected areas. The 21 helicopters within its group, augmented by U.S. Marine Ospreys deployed from Okinawa, provided an indispensable front-end airlift capability for the relief effort. Although the carrier group has now departed, the U.S. Navy's hospital ship USS Mercy is expected to join the relief effort in December after crossing the Pacific.

The U.K. Royal Navy, after a prolonged absence from the region, was fortuitously well placed to respond. HMS Daring, a Type-45 destroyer, was diverted from the South China Sea to deliver assistance near Cebu. HMS Illustrious, with a complement of seven helicopters, was also committed to the relief effort. While Illustrious brings far more capability, the fact that Daring and her crew were able to respond immediately demonstrates the flexibility of other warships in the HADR role.

The naval element is also prominent in Japan's largest peacetime overseas deployment of the Self Defense Forces, involving 1,100 personnel, 16 military aircraft and three ships, including the flat-topped JDS Ise, which can carry several helicopters and a large volume of stores. China's navy also belatedly dispatched a hospital ship to the Philippines.

The more surprising omission was ASEAN, given its recent focus on HADR. For example, an ARF exercise in Thailand this May was designed to "rapidly provide coordinated and effective disaster relief". In June, Brunei and Singapore co-hosted a combined military medicine/HADR exercise "to enhance interoperability and understanding through cooperation and contribution of military assets and personnel from ADMM-Plus nations." ASEAN's Secretary General is also dual-hatted position as ASEAN's Humanitarian Assistance Coordinator.

Singapore, Brunei, Thailand and Indonesia provided mostly air transport in terms of military assistance. ASEAN's Coordinating Centre for Humanitarian Assistance on disaster management did manage to pre-position personnel in the Philippines. However, comments attributed to the Thai and Indonesian foreign ministers in Bangkok on 14 November suggested mounting frustration that ASEAN's response was materialising more slowly than those from extra-regional countries. Thai Foreign Minister Surapong Tovichakchaikul proposed that "a quick response team is needed for ASEAN, the 10 countries have human resources and enough equipment, so it is time to share and cooperate."

At the national level, while ASEAN's armed forces capabilities are limited, even niche contributions can be useful, provided personnel are trained and that a coordinated response plan is worked out in advance. Having made HADR the centrepiece of recent defence cooperation exercises, ASEAN's piecemeal response to the real-life disaster in the Philippines has exposed a need to operationalise HADR rapid response among its members, not only leveraging upon the capabilities of their external partners.

CHINA | 27 NOVEMBER | SOUTH CHINA MORNING POST

## **Aircraft carrier Liaoning begins drills in sensitive South China Sea with battle group**

China's first aircraft carrier has set off for training exercises in the politically sensitive waters of the South China Sea. It is the first time the Liaoning has carried out drills in the area, parts of which are claimed by Vietnam and the Philippines. Beijing is currently embroiled in a diplomatic row with Japan after Chinese forces set up an air defence zone over the East China Sea over the weekend which includes disputed islands also claimed by Tokyo.

## **Japanese ships disrupt Chinese military exercises**

China's Defence Ministry said on Thursday it has lodged a formal diplomatic complaint over what it called "dangerous provocation" by Japan for shadowing Chinese military exercises in the western Pacific. Sino-Japanese ties have been strained for months by a dispute over tiny islands in the East China Sea believed to be surrounded by energy-rich waters.

## **North Korea reveals warship sinking**

North Korea has revealed that one of its warships sank last month, killing a number of sailors, in a rare admission of military failure. State media reported a visit by leader Kim Jong-un to a naval cemetery for the crew of "submarine chaser No 233". Photographs showed Mr Kim surrounded by more than a dozen gravestones inscribed with the date 13 October. The report said the vessel had been performing combat duties but gave no more information about what happened.
